DETAILED ACTION

Priority

1. An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

It is noted that per 37 CFR 1.78, such amendment to the first sentence or such application data sheet must be submitted "within the later of four months from the actual filing date of the later-filed application or sixteen months from the filing date of the prior-filed application". It is also noted that 37 CFR 1.78 sets forth the criteria for filing a petition to accept an unintentionally delayed claim under 35 USC 120, 121, or 365(c) for the benefit of a prior-filed application, and that one such criterion sets forth that the reference required by 35 USC 120 to the prior-filed application, unless previously submitted, must be supplied.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground

Application/Control Number: 10/083,736 Page 3

Art Unit: 3729

provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 5-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-6 of U.S. Patent No. 6,370,760, referred to hereinafter as '760. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application are nearly identical to the claims of '760 with the exception of '760 reciting the limitation of "while the rotor rotates" (col. 4, line 3). However, the Claims of '760 are a more specific embodiment that is covered by the broader claims of the instant application. Otherwise noted, the broader claims of the instant application "anticipates" the claims of '760. See *In re Goodman*, 11F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993).

Allowable Subject Matter

4. Upon the filing of a proper Terminal Disclaimer, it appears that the rejection above would be overcome with respect to Claims 5-10.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The IEEE Publication to Ohki is relevant as to the state of the art of heat shrinking.
